

HYC Harbor Spill control Training

Immediately stop the flow of fuel

Using spill matts and booms located at Mast Crane contain and or confine spill

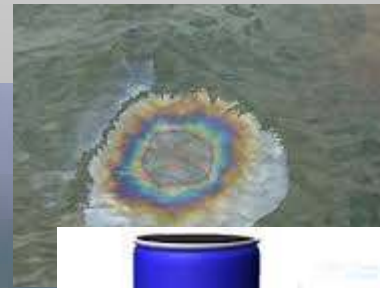

If fuel spill can't be contained and cleaned up using available equipment you must contact HYC board and also CC underground at (705)327-2751. They have a 24 hour emergency response that can bring a Vac truck to HYC and suck up and dispose of the contaminated fuel and water

cleanup cost are the responsibility of the boat owner and should be dealt with by your insurer.

The cost to clean up a boat size fuel spill could be in excess of \$4000.00

Prevention is the key
